## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-57, drawn to a display device, classified in class 359, subclass 242.
  - II. Claim 58, drawn to a method of preparing particles for use in an image display of a display device, classified in class 359, subclass 296.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make a materially different product such as a photopolymer printing plate or an ink jet printer.
3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
4. This application contains claims directed to the following patentably distinct species: Embodiment 1-1 – figures 3, 4A, 4B, 5A, and 5B, Embodiment 1-2 – figures 6A, 6B, 7A, and 7B, Embodiment 1-3 – figures 8A, 8B, 9A, and 9B, Embodiment 1-4 – figures 10A and 10B, Embodiment 1-5 – figures 11A and 11B, Embodiment 1-6 – figures 12A, 12B, 13A, 13B, 14A, 14B, 15A, and 15B, Embodiment 2-1 – figures 16, 17A, 17B, 18A, and 18B, Embodiment 2-2 –

Art Unit: 2873

figures 19A and 19B, Embodiment 2-3 – figures 20A and 20B, Embodiment 3-1 – figures 21, 22A, 22B, 23A, 23B, 24A, and 24B, Embodiment 3-2 – figures 25A and 25B, Embodiment 3-3 – figures 26, Embodiment 3-4 – figure 27, Embodiment 4-1 – figure 28, Embodiment 4-2 – figure 29, Embodiment 4-3 – figures 30A and 30B, Embodiment 4-4 – figures 31 and 32, Embodiment 4-5 – figure 33.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and

Art Unit: 2873

specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brandi N. Thomas whose telephone number is 571-272-2341. The examiner can normally be reached on 7- 4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ricky Mack can be reached on 571-272-2333. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
